Countryside with a Contemporary Spirit

The urban layout is centered around creating an open, interconnected environment that encourages social interaction and family-oriented outdoor living. A carefully designed network of pedestrian pathways allows parents and children to move freely through expansive green spaces. Along these paths, thoughtfully placed rest areas and elegant wooden seating elements provide moments of relaxation and quiet reflection within nature.

MASTERPLAN

MIDTOWN EAST is designed as a cohesive urban system integrating usability, quality of life, and operational efficiency within a refined, forward-looking, and sustainable environment.
